Manuring & Fertilization

Generally 100kg N, 40kg each of P_2O_5 and K_2O per hectare is recommended of which 20 kg N and the entire P_2O_5 and K_2O are applied as basal dose. The balance 80 kg of N is applied in four split doses during each year. CIMAP centre at Srinagar has obtained highest spike yield by application of 150kg N/ha.
