## Manuring & Fertilization

For improving the fertility of the soil, FYM (25 t/ha) is applied 15 days prior to transplanting. A fertilizer dose of 90kg N, 90 kg P<sub>2</sub>O<sub>5</sub> and 75 kg K<sub>2</sub>O per hectare is optimum for good growth and yield of the crop, of which 45 kg N and entire amount of P & K are applied as basal dose. While the balance Nitrogen is applied as top dressing 45 days after transplanting.
