

Beet

Varieties

Detroit Dark Red :

The variety produces perfectly round beet with smooth uniform red skin. The interior colour is dark red with light red zoning. Flesh is tender and fine grained, tops small; leaves dark green tinged with maroon. It is a heavy yielding cultivar. Crop matures in 80-100 days.

Crimson Globe :

Beet is globular to flattened in shape, medium red in colour with small shoulders. Flesh medium dark crimson red with indistinct zoning top. Leaves are medium-large, bright green with and have a higher maroon shade. It is a high yielding cultivar.
