### Policy Issue

The issue regarding funding the component of anti hail/bird net under the scheme of NHB was discussed. It was felt that as per the present provision of the scheme guidelines this is an add on component to be considered as a part of protected structure projects. Hence considering this component in standalone mode for open field projects, particularly in the case of apple, may not desirable, as its measurable monitoring in standalone mode may be difficult. The committee recommended that the anti-hail/bird net component may be considered for open field projects of more than 5 acres as a component in the integrated projects only.

**Meeting ended with a Vote of Thanks to the chair.**
